SUMMARY

Backend-focused Software Engineer with strong foundations in Data Structures, Algorithms. Experienced in building scalable backend systems, RESTful APIs, and AI-powered applications. API integration

TECHNICAL SKILLS

Languages: JavaScript, Java, C++

Frontend: React.js, HTML, CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, Authentication

Databases: MongoDB, MySQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

EDUCATION

Bharati Vidyapeeth's College of Engineering (BVCOE)

B.Tech in Computer Engineering (CGPA: 9.52)

New Delhi, India

Pursuing

Jamia Millia Islamia (JMI)

Diploma in Computer Engineering (CGPA: 9.1)

New Delhi, India

2021 – 2024

PROJECTS

SCATCH | *Node.js, Express.js, EJS, MongoDB, JWT, MVC Architecture* | 🌐 GitHub

- Built a full-stack e-commerce web application for bags and accessories using Node.js and Express.js following a clean MVC (Model-View-Controller) architecture.
- Implemented user authentication and session management using JWT and custom middleware for secure route protection and role-based access control.
- Designed dynamic server-side rendered views using EJS templating engine with reusable components for product listings, cart, and checkout flows.
- Structured the backend with dedicated controllers, models, routes, and utility modules ensuring clean separation of concerns and scalable codebase organization.
- Integrated MongoDB for persistent data storage of products, user accounts, and order information with efficient querying and schema design.

Bus Ticket Booking System | *Software Requirements Elicitation and Modeling*

- Designed and developed a Bus Ticket Booking System as part of a 5-week industrial training program at Indraprastha Institute of Information Sciences (IIIS), New Delhi.
- Performed detailed software requirements elicitation and modeling, translating real-world business needs into structured system specifications.
- Developed core booking workflows including seat selection, fare calculation, and ticket management.
- Collaborated with industry mentors to follow professional software development practices and lifecycle standards.

CERTIFICATIONS & TRAINING

• **Five Week Industrial Training on Software Development** — Indraprastha Institute of Information Sciences Delhi (IIIS), Jun 2023 – Jul 2023.

Worked on the project *Software Requirements Elicitation and Modeling of Bus Ticket Booking System*.

ACHIEVEMENTS

- Ranked in Top 10 at Hack@BVP hackathon, showcasing innovation, coding skills, and effective collaboration.(2026)
- Published a research paper “*Elevating Seamless Housing Navigation with Precise Recommendations for Personalized Rental Experiences*” with Springer Nature (2024).
